

Query, Manage, and Optimize Your Clinical Supply Portfolio – Powered by AI

Signant's Forecasting & Planning Assist™ empowers clinical supply teams to direct their expertise and time where it matters most: the decisions that require judgment, experience, and know-how. The routine data checks, configuration tasks, and portfolio monitoring that consume hours of supply teams' time are simplified by agentic AI, with you in control throughout. No new system to learn. No new interface to navigate. Just ask, in plain English, inside the platform that supply teams already use every day.

Why Forecasting & Planning Assist

Managing a growing clinical supply portfolio means more data, more decisions, and more risk. Forecasting & Planning Assist was built for exactly that.

INSTANT ANSWERS

Query your full portfolio in plain English across trial data, supply snapshots, enrollment statuses, and more, without navigating multiple screens or waiting for reports.

Example: “Show me all trials with no new patient enrollments in the past 2 months”.

PROACTIVE RISK MONITORING

Rigorously scan across every trial and program to surface supply and enrollment risks before they escalate.

Example: “Show me which distribution depots have stock expiring in the next 30 days”.

SIMPLIFIED WORKFLOW

Execute configuration tasks, data updates, and enrollment changes through a single conversational prompt, with a complete GxP-compliant audit trail throughout.

Example: “Add a new distribution depot in Germany”.

How Forecasting & Planning Assist works

Forecasting & Planning Assist is built on Signant's secure Agent Assist enterprise-grade foundation, and operates using four targeted agents, designed with the activities of the clinical supply manager in mind.

GxP-compliant and role-based

Fully auditable, every action operates within each user's existing permissions and access rights.

Purpose-built for clinical supply

Agents are trained on clinical supply workflows specifically, with enterprise security and compliance built in by design.

Validated and accurate

Agents operate only within verified data structures and approved workflows, ensuring outputs meet GxP standards.

Four purpose-built agents, one integrated solution.

Forecasting & Planning Assist delivers four purpose-built agents, each designed to address a **key area of clinical supply operations**.

ADMIN AGENT

- Query trial and supply data, master data records, and depot capabilities across the full portfolio
- Add, update, and configure master data records and depot-country relationships at scale
- Import and onboard users from lists or Active Directory and assign roles without manual account-by-account setup

SUPPLY PLANNING AGENT

- Identify lots expiring without a confirmed replacement and flag planned lots without sufficient lead time
- Flag overdue scheduled lots and alert on depot-level supplies approaching depletion
- Identify studies with active demand but no supply plan in place

DEMAND PLANNING AGENT

- Update enrollment actuals and trial configuration, including countries and enrollment schedules
- Model enrollment scenarios to assess supply impact based on variable recruitment rates

TRIAL HEALTH AGENT

- Monitor the full portfolio for missing enrollment actuals, outdated utilization schedules and data gaps
- Alert when actual enrollment deviates from plan assumptions beyond a defined threshold

The value of Forecasting & Planning Assist

SPEED

Portfolio-wide data checks completed in seconds, regardless of portfolio size.

EASE

Instant answers through a simple, conversational prompt in plain English.

EFFICIENCY

Expert time redirected from routine tasks to high-impact supply decisions.

RISK MITIGATION

Proactive identification and surfacing of supply and enrollment risks.

SECURITY

Full GxP audit trail within existing role-based permissions. No additional governance required.

Proven results

Signant's Forecasting & Planning solution has enabled clients to achieve significant cost savings across clinical development portfolios, reduce medication waste, and decrease emergency shipments. Forecasting & Planning Assist builds on this proven foundation, accelerating how users work within it to amplify the value it already delivers.

20% +
cost savings

30% +
reduction in medication
waste

40% +
decrease in emergency
shipment

WHO IS SIGNANT HEALTH?

Signant Health is the evidence generation company, leveraging software, deep therapeutic and scientific knowledge, and operational expertise to deliver quality evidence across traditional, virtual, and hybrid trial models. For over 25 years, 600+ sponsors and CROs of all sizes – including all Top 20 pharma – have trusted Signant's comprehensive eClinical solutions. Our clinical outcome assessments (eCOA, clinician ratings, cognitive testing) and wearable digital health technologies powered by Ametris provide the industry's most comprehensive evidence generation capabilities, alongside EDC, eConsent, RTSM, supply chain management, and data quality analytics.
