

Optimize the Flow of Study Supplies

Signant's RTSM is not just another randomization and study supply portal. Top sponsors and CROs rely on Signant SmartSignals RTSM as the preferred solution to effectively manage even their most complex trial needs. Retire your spreadsheets or slow, costly IVR/ IWR systems in favor of more efficient RTSM design, implementation, and management.

Rapid deployment

New study builds delivered in as little as 3 weeks, from requirements sign-off to UAT, powered by AI and expert oversight throughout.

Optimal flexibility

Our RTSM solution uses advanced algorithms to dynamically adjust to protocol-specific needs.

Expert support

Data analytics and central review services add an additional layer of quality control by monitoring in-study data for potential quality concerns.

Modern features

For an optimal user experience, we've improved the product's front-end interface to include contemporary design standards, dashboards, and reporting capabilities.

- A global map showing site & patient count by country
- Screening & randomization progress reports
- KPI visibility
- Flexible export
- Customizable views for granular insights
- Single sign-on via ID Portal with multi-factor authentication

Why choose Signant SmartSignals® RTSM?

Set your study up for success with our robust, full-featured study supply management solution, and lean on support from a dedicated project team and 24/7 helpdesk from study launch to close.

- 1 Support traditional, virtual, or hybrid trials with a direct-to-patient model of clinical supply delivery and management.
- 2 Get visibility and control regardless of protocol design, randomization schemes, or other complex requirements.
- 3 Direct medication only to where the study needs it, limiting waste and reducing overages.
- 4 Plan mid-study production based on accurate study usage data.
- 5 Handle mid-study amendments faster and with confidence. AI tools assist impact assessment, build, and testing, with Signant specialists approving every stage.
- 6 Optimize supply management with free picking, allowing your depot or supply software to choose kit numbers, reducing waste, and improving efficiency.
